4. Which of your unit's strategic goal driven activities specifically help increase enrollment from Metro Atlanta, Macon, or Columbus?

Text Response	
Providing education and training in caregiver courses/programs	
Participate in FEA conferences to recruit	
Increase marketing of RN-BSN and MSN Programs	
TV and Radio Commercial production	
Through sport specific athletic recruitment.	
We send information on our program to high schools within 100 miles and all science-related magnet schools in the state.	
Purchasing online, digital, TV and radio advertisements in those strategic areas	
retention strategies	
Development of Digital Cinema emphasis in major; Collaborating Georgia Movie Academy with Chattahoochee-Flint RESA under the auspice of the Rylander Theater/CP Productions program; active participation in Georgia Theater Conference including periodic hosting of state convention; hosting GHSA and GISA one-act events either on campus or at the Rylander.	
none	
Maintaining and upgrading facilities	
Accelerated WebBSIT program (Georgia Perimeter College – GSW), Marketing materials on GeorgiaOnMyLine website, Transfer Agreement with Georgia Central Technical college, Macon.	
PR and demonstrations to these areas	
Accelerated WebBSIT program (Georgia Perimeter College – GSW), Marketing materials on GeorgiaOnMyLine website, Transfer Agreement with Georgia Central Technical college, Macon.

5. Which of your unit's strategic goal driven activities help recruit transfer students, especially from USG State Colleges or Technical College System of Georgia institutions?

Text Response
Pope Fellowship and Scholarship opportunities
Work with Darton, ABAC, and South GA Tech to educate on prerequisite courses and activities needed prior to arrival at GSW, speak with students at those three institutions
Increase marketing of RN-BSN programs
TV and Radio Commercial production
Through sport specific athletic recruitment
We send information on our program to two-year schools in Georgia, and are preparing to do the same to similar institutions in Alabama and north Florida.
Advertising GSW directly on USG state college campuses and championing the Go Back. Move Ahead. campaign led by both the USG and the TCSG
transfer policies
Close collaboration with theater program at Darton College
none
Maintaining and upgrading facilities
Transfer Agreements with Darton, Bainbridge, and Georgia Central Technical Colleges.
PR, demonstrations, tours,visits
Transfer Agreements with Darton, Bainbridge, and Georgia Central Technical Colleges.

7. Which of your unit's strategic goal driven activities help carefully increase enrollment in another way (please explain how the specified activities relate to increasing enrollment)?

Text Response	
Providing education and training through enrollment in the Caregiver Certificate Program	
Increase number of graduate programs offered and courses offered online in graduate programs; increase the number of hybrid course offerings in undergraduate program	
Our staff members actively engage with parents and prospective students at Preview Days. We have representative from all of the subunits under the ARC banner.	
Admit students twice yearly to precicensure students and rolling admission of RN-BSN students	
support the network and IT infrastructure that allows our web page and other online resources function	
Utilizing the border state initiative program through sport specific recruiting	
By offering quality instruction in geology and physics, and by offering specific courses for early childhood education (ISCI 2001 - 2002) we help retain students thereby effectively increasing enrollments throughout our campus.	
Engaging with prospective students on social media, publicizing current student achievement online and in the news (prospective students and parents from these areas see how GSW students are succeeding)	
Goal One, Objective 4: Increase Retention and Graduation Rates: The Student Conduct Office's Goal: To educate students regarding making decisions that lead to more socially responsible patterns of behavior: Activity is the Social Responsibility Class for all students who violate the student code of conduct. The curriculum for this class is responsibility vs. risky behaviors including sessions on alcohol, drugs, tobacco, healthy relationships, sexual responsibility, sexual violence, social media, laws, decision making, civility, and academic integrity. The ATOD committee also has state in its mission statement: "Oversee the general education of the campus community in relation to policies, laws, and risks associated with ATOD issues including programming, classes, seminars, and workshops. The ATOD task force seeks grant funding to supply the campus community with the health magazine Student Health 101. ATOD also presents programs in classes through the "Don't Cancel That Class Program" related to alcohol, drugs, health, and safety issues.	
The number of Dramatic Arts majors grew by 32% over the period of this review The definition of the Communication and Media Arts emphasis has proved effective, but the lion's share of credit hour generation remains in Theater. We would advocate that the institution consider aspects of the programs "novelty" for examples which could be applied to the institution as a whole. We primarily use data as a tool to persuade those in our stakeholder groups who are invested in data that the program's productivity given its resources is exemplary, and to place program productivity in context of discipline based norms. As "outliers", we are suspicious of the current fixation on "data." It seems a likely manifestation of Thomas Kuhn's notion of paradigm paralysis articulated in The Structure of Scientific Revolutions: "Normal science does not aim at novelties of fact or theory and, when successful, finds none." (pg 52) Discoveries are Rare Because Expectations Obscure our Vision: The fact the normal science does not aim at novelty, as Kuhn has argued, cries out for explanation. Briefly, Kuhn's response is that scientists are entrenched within a certain way of seeing things, and this clouds their vision (they tend to see what they expect to see). As an instance of what Kuhn thinks is a general psychological phenomenon, he cites a study by J. S. Bruner and Leo Postman, "On the Perception of Incongruity: A Paradigm," Journal of Personality XVIII (1949) 206-23. . . . In sum, Kuhn seeks to explain the difficulty of discovery as an instance of the general psychological fact that our expectations cloud our perception of the world. ( <a href="http://philosophy.wisc.edu/forster/220/kuhn.htm">http://philosophy.wisc.edu/forster/220/kuhn.htm</a> ) The risk is that "data" is only interpreted with an eye toward expected outcomes, not novelty. By any truly objective assessment, the exemplary accomplishments of Dramatic Arts have not come about through any attention to data, but rather a commitment to vision and engagement; imagination, creativity, and innovation; on dynamics first charted by Fredrick Polak in The Image of the Future. The fundamental problem is there is an unwarranted bias against creativity, the arts in general and Dramatic Arts specifically: People often reject creative ideas even when espousing creativity as a desired goal. To explain this paradox, we propose that people can hold a bias against creativity that is not necessarily overt, and which is activated when people experience a motivation to reduce uncertainty. In two studies, we measure and manipulate uncertainty using different methods including: discrete uncertainty feelings, and an uncertainty reduction prime. The results of both studies demonstrated a negative bias toward creativity (relative to practicality) when participants experienced uncertainty. Furthermore, the bias against creativity interfered with participants' ability to recognize a creative idea. These results reveal a concealed barrier that creative actors may face as they attempt to gain acceptance for their novel ideas. <a href="http://digitalcommons.ilr.cornell.edu/cgi/viewcontent.cgi?article=1457&amp;context=articles">http://digitalcommons.ilr.cornell.edu/cgi/viewcontent.cgi?article=1457&amp;context=articles</a> And yet: According to a survey of 1,500 chief executives conducted by IBM's Institute for Business Value (IBM), CEOs identify "creativity" as the most important leadership competency for the successful enterprise of the future. <a href="http://www.businessweek.com/innovate/content/may2010/id20100517_190221.htm">http://www.businessweek.com/innovate/content/may2010/id20100517_190221.htm</a> <a href="http://www.forbes.com/sites/work-in-progress/2010/07/16/creativity-is-the-new-black/">http://www.forbes.com/sites/work-in-progress/2010/07/16/creativity-is-the-new-black/</a> <a href="http://www.fastcompany.com/1648943/most-important-leadership-quality-ceos-creativity">http://www.fastcompany.com/1648943/most-important-leadership-quality-ceos-creativity</a> It is very telling that "Creativity" is not mentioned in the new institutional SLO's in any way shape or form.	
attract students through well-known brands (dining services) and affordable textbook materials.	
Noted above	
The following activities also relate to increasing enrollment: Annual Mathematics Tournaments, Mathematics and Computer Science Summer Camps, Collaboration with Americus Sumter High School, and Preview Days.	
exhibitions/visiting artists reach community and stimulate interest

11. Which of your unit's strategic goal driven activities help GSW recruit Chinese students?

Text Response	
produced a chinese version recruitment video	
Development of MOUs, improvement to International Scholar and Student programs	
Intramural sports and Fitness Wellness programs	
more affordable international insurance	
Maintain and improve facilities	
The School communicated with several MOU Universities in China such as Shanghai Ocean University, Shandong University of Technology, and Jilin Institute of Chemical Technology to explore opportunities of some joint programs and recruiting students. The main problem is that these universities prefer a 3.5 + 1.5 program, which now requires special permission of the US Immigration Authorities. GSW has no such a permission yet. We are going to explore the 2+2 and 4+1 programs in the current academic year.	
None	
Studies abroad to China, KWynn visits/teaches each summer in China

19. What online courses has your unit created to support the need for flexible general education options?

Text Response
Introduction to Caregiving; The Caregiving Journey and other course in the caregiving certificate
MUSC 1100 Music Appreciation
online activity and CPR courses
1101, 1102, 2110, 2120, 2130 7 various graduate courses
n/a
we provide IT support for these programs
Online Criminal Justice Program, Online course offerings in Psychology and Sociology
THEA 1100 - Theater Appreciation; COMM 1110 - Introduction to Speech; THEA 1110 - Performance Skills for Business & Professions
The following courses were created or updated to support the need for flexible general education options: CIS 1000 Computer Applications, CSCI 2100 Assembly Language, MATH 1101 Elem Math Modeling, MATH 1113 Precalculus, and MATH 2204 Elementary Statistics.

Statistic	Value
Total Responses	9

20. What other strategic goal driven activities has your unit undertaken in support of on-line courses or programs?

**Text Response**

None

offered MUSC 1150 History of Rock & Roll online in summer

development of a mainly online MA program

we provide IT support for these programs

Online Criminal Justice Program, Online course offerings in Psychology and Sociology

We began working toward implementing eCore which began fall 2016.

Creation of Epsilon Delta Lambda, online honor society

To support the Master of Education in Middle Grades Mathematics program the School created the following three online courses: MATH 5000 Algebra for Middle Grades, MATH 5001 Geometry for Middle Grades, MATH 5003 Statistics for Middle Grades. The School's Computer Network was updated and now includes new virtual labs, higher level of security, and wireless access.

24. Which of your unit's strategic activities support student academic success?

**Text Response**

Providing a nurturing environment for students in our online courses  
 LIBR1101, Customized classes, collection development

Use of beacon; contacting students for advising; notification after DWF reports; orientations;

We have developed threshold that allow us to identify at-risk freshmen biology majors and place them into courses that will strengthen their foundations and ultimately increase their success in the major.

Accommodations  
 professional advisng, counseling, academic recovery classes, individualized academic recovery plans, academic support (tutoring and supplemental instruction), state of the ar, accessible computer lab, productive study environment, campus resource referrals

Increase retention and graduation of prelicensure students through intrusive advising, mandatory supplemental instruction, and SURGE Center  
 we provide IT support for these programs

Supplemental INstruction for CHEM 1151, 1152, 1211, 1212, Purchasing online homework system for CHEM 1211, 1212. Limiting class size in introductory courses.

Review and Revise Internship Program, Review and Revise Curriculum, Enhance Student Advising

mandatory study hall, utilization of academic resource center, mandatory student athlete advising, mandatory student athlete compliance meetings

We continue to upgrade and utilize DegreeWorks to help students better understand their academic success. We are working with ITS in Athens to pull reports from DegreeWorks to better identify who is ready for graduation, but has yet to apply.

We teach many introductory level courses, some of which are necessary for other majors on our campus (Core earth science, physics and integrated science courses).  
 revisions academic support services, storm spotters, scheduling, early warning system

Broad based active learning across the curriculum that builds student engagement.  
 affordable textbooks/supplies

Intramural sports and Fitness Wellness programs

Maintain and improve facilities

School's multi-year course schedules were updated and published on the on the School website. Updated and published on the School website three and four year plans of study for each School's major. The School faculty made presentations to Math, CS, and IT students in the UNIV 1000 class. Organized a Field Trip to the Phoebe Sumter IT Department. Organized a Job Showcase and a Roundtable Discussion. Provided free software from leading computing companies such as Microsoft, IBM, VMware, and MathWorks Inc.

maintaining current and quality curricula, regular advisement, very flexible access to faculty

26. Which of your unit's strategic activities help eliminate obstacles to student academic or social success?

**Text Response**

Advisement for students in the Caregiving Certificate

wireless access, extended hours

The faculty and staff provide a significant amount of face to face contact with student both inside and outside of the classroom.

Accommodations

Pro-active outreach to students, student-centered culture for all ARC professional and student employees

Sustain SURGE Center after grant funding ends

we provide IT support for these programs. Support the network which connects students electronically

I do not understand the difference between this question and the first one. But I have no more to offer here.

Departmental website provides resources

Following NCAA and Peach Belt Conference bylaws. Through our Student Athlete Advisory Committee we have guest speakers, attend lectures, and give student athletes a forum to express concerns or issues dealing with student athlete welfare.

We have been working on ways to make the graduation process easier for our students and advisors using DegreeWorks.

academic policy reviews,

Social Responsibility Class, Student Health 101

STORM Day Surveys, Orientation Surveys, Gameroom Surveys, Student Appreciation Day Surveys

Title IX Training

Intramural sports and Fitness Wellness programs

Maintain and improve facilities

Organized independent studies as needed. The School and the Academic Resource Center worked together to provide tutoring service to students in Mathematics and Computer Science classes. Academic advisors helped students to solve academic or social problems.

36. Which of your unit's strategic goal drive activities help GSW increase the use of complex, problem-oriented assignments and projects that integrate skills and knowledge from the Core curriculum with discipline specific content and skills?

Text Response
Biology requires all graduates to complete a research project that includes: project development, experimental design, realization of the experiment, data collection and analysis, and communication of findings.
Expand nursing education opportunities to meet healthcare workforce needs and meet needs of clients in local, national, and global community.
we provide IT support for these programs.
Senior assessment strategies, writing in ALL lab courses
We provide quality instruction that includes hands-on learning in our introductory and upper-level science classes, and unlike other schools, we also provide a strong hands-on component in our ISCI courses for early childhood majors.
The very nature of producing theater and cinema projects makes them problem-oriented projects that require integrated skills and knowledge across a variety of core disciplines (history, literature, technology, the science of human behavior; these projects engage both students in core courses from a wide variety of majors as well as students majoring in performance and media.
None
The Scholl does not have such a strategic goal. The General Core Mathematics is used for formalization and solving problems in CS/IT complex, problem-oriented assignments and projects. For example, this is a PLO2 in the BSCS program: Students are expected to have an ability to apply knowledge of computing and mathematics, analyze problems, identify and define the computing requirements appropriate to its solution.
all academic/curricular activities in studio and art history assignment projects

37. Which of your unit's strategic goal drive activities help GSW increase the use of capstone experiences, internships or student research?

**Text Response**

Biology requires all graduates to complete a research project that includes: project development, experimental design, realization of the experiment, data collection and analysis, and communication of findings.

Research seminars in both History and Political Science are capstone experiences that require proficiency in writing, oral communication, and critical thinking. The research methods courses are assessed on a regular basis.

No goal specifically addresses this, however, all students participate in a capstone practice learning experience during the final semester

we provide IT support for these programs.

none

Our contacts with local industry and the park service can lead to internships for our students, and our majors have to do a senior thesis project before they graduate.

THEA 4111 and COMM 4112 are required capstone courses that require an applied production component and a portfolio that documents the achievement of SLOs for the program.

None

Increase a number of real-world projects. Implement industrial-strength software in class projects and assignment.

Senior exhibition/thesis/museum interns/studio methods and materials as integral research components

38. Which of your unit's strategic goal drive activities help GSW increase the number of graduates in critical STEM related fields?

Text Response	
we provide IT support for these programs.	
All of our goals aim to increase the success of our (STEM) graduates.	
We offer a degree in Geology, and 90%+ of our graduates are working in field or in graduate programs.	
We would advocate GSW needs to catch up with the times and recognize the need to change STEM to STEAM and include the arts and cultivation of creativity in this focus.	
None	
Increase enrollment and a number of graduates in computing programs.	
none, NEED steAm, put the arts into STEM as others are finally doing nationwide, then we would have these goal activities	

Statistic	Value

39. Which of your unit's strategic goal drive activities help GSW increase the number of graduates prepared for careers in areas of regional need, such as medicine, social work, P-12 education, or economic development?

Text Response	
The offering of a History Teacher Certification degree addresses regional needs in P-12 education.	
Accommodations	
Implement undergraduate and graduate curricula to meet current needs of healthcare workforce	
we provide IT support for these programs.	
Improving success in introductory courses and advising of PrePharmacy students	
We offer a Earth and Space Science Education track, through which those majors take education courses in order to prepare them for alternative preparation programs for K-12.	
The entertainment industry is the second leading export of the country and the 3rd fastest growing economic segment of the state's economy. We also continue to build support for enhanced partnership activities with Rylander Theater that can create jobs for our student's here and contribute significantly to community building and economic development.	
None	
To increase the productivity of the Mathematics Department (teaching classes in the Master of Education in Middle Grades Mathematics and the B.S. in Education with a Major in Early Childhood Education program) and help GSW to increase the number of graduates prepared for careers in areas of regional need.	
our curricula prepare our students to be hired as provisional art teachers and pass GACE exams for art teaching employment; our studio programs/curricula prepare students for many jobs that are vital in economic development: art centers, glass studios, photography, etc

40. Which of your unit's strategic goal drive activities help GSW enhance existing academic programs in some other way (please explain how the specified activities relate to enhancing existing academic programs)?

**Text Response**

Through the use of specialized instruction sessions, we are able to tailor content to the needs of the student. Understanding information and its context to the subject can enhance the program.

Offer an appropriate array of academic courses that meet the standards of regional and national accreditation agencies.

Testing Center provides entrance exams for certain programs on campus

Our academic support unit offers Supplemental Instruction to enhance student access to coursework and promote successful completion of courses, especially within the Core.

Advance credentials & competencies of faculty consistent with evolving program needs (goal to have all faculty doctorally prepared and at least 50% attain Certified Nursing Educator designation; Provide opportunities for students to expand their clinical expertise in a broad spectrum of practice settings

we provide IT support for these programs.

Offering CHEM 1151/L and CHEM 1152/L for the School of Nursing with Supplemental Instruction. Also, we are working with the Department of Biology to make sure their students can progress in a timely manner towards taking Biochemistry in their Junior Year instead of their Senior year. This should help improve their success on the MCATs. We are routinely offering CHEM 1211 and 1212 in the summer for students who are deficient in math 1111 and cannot take it upon entering as freshmen.

We have found with the implementation of DegreeWorks that we are able to help the departments find anything in their areas that need adjusting or updating to make it clear for their faculty and students.

Our productions serve as artifacts for analysis in assignments across a variety of other disciplines.

Maintain and improve facilities

Include Students/ Faculty Focus Group meetings in the annual assessment process. The purpose of this activity is create a dialog of students and faculty related to enhancing existing academic programs.

art history augments coursework in History; Digital Arts courses are part of CIS multi-media thread, studio work can be individually focused for students in Psychology considering art therapy master's degrees/women's studies

**Text Response**

Support the instructioal, information, research, and curriculum needs of the University.

Student present their research findings before their peers and faculty.

The maintenance of quality educational programs.

Accommodations

Our overall approach to student learning, especially for first year students, is to assist them in seeking opportunities for intellectual growth. We stress the importance of expanding one's education beyond ticking off a completion box. We challenge our students to explore new ideas and programs to spark their intellectual curiosity.

Increase number of faculty engaging in scholarly endeavors

we provide IT support and network connectivity.

We are engaging with more chemistry activities. These are in concert with the ACS.

ATOD's Don't Cancel that CClass Program"

Enhancing and showcasing faculty produced creative work via partnership with Rylander Theater; involving students in that creative work as civic engagement (7,000 hours per year); increasing enrollments (numbers of majors up 34%); partnering with outside entities such as Cultural Authority/Rylander, Georgia Theater Conference, Kennedy Center American College Theater Festival, andChattahoochee-Flint RESA (Georgia Movie Academy).

Intramural sports and Fitness Wellness programs

Maintain and improve facilities

Provide programming focused on the developmental needs of college students to maximize their potential to benefit from the academic environment and experience.
