Hello,

The College of Business and Computing faculty and staff are glad you have chosen to enroll in online courses this term. The BBA eMajor program is ideal for students who wish to take advantage of online courses as they seek alternative routes to degree completion. Our AACSB and SACS accreditations are invaluable to you as you pursue your career goals. To maintain these accreditations, we must take steps to ensure the academic integrity of our programs. One way we satisfy these requirements is to contract with ProctorU for proctored testing.

The decision to use ProctorU exclusively was made for a few simple reasons . . .

- ProctorU provides technical support to our students
- ProctorU has live people assisting test takers from start to submission of the exam
- ProctorU offers 24/7 testing possibilities from home, work or local public library
- ProctorU is less expensive than testing centers

ProctorU updates procedures frequently so if you haven’t tested with their service in a few months or are a first-time tester it is important to test your equipment and review their information. The staff at ProctorU is available to ensure you have the best testing experience possible but, ultimately, you are responsible for successful testing.

Get to know ProctorU at this link.
Find out how proctoring works.

Testing out your equipment is important. Click here to find solutions for issues.

You will need to use either Chrome or Firefox and download the extension.

Making an appointment is easy, watch and see for yourself. Click here.

Create a positive testing environment. Click here for tips.

How to perform the test call required in the mandatory attendance quiz. Click here for details.

Our goal in the College of Business and Computing is to help you be successful in your academic career. Watching the videos, testing out your equipment, making appointments early, reviewing common issues and creating a positive testing environment are all important to your success with ProctorU. We hope you find this information will lead to a less stressful testing experience.
