

The following table illustrates a typical four-year progression to a BS in Mathematics at Georgia Southwestern State University. Due to our small number of majors, our upper division courses are offered either once a year or once every two years. It is essential that you maintain close contact with your advisor so that he or she can tell you when courses will be offered. In certain cases, courses are offered on an "as needed" basis, so it is also important that you discuss your expectations with your advisor.
