Bachelor of Science in Long-Term Care Management
An Interdisciplinary Degree
Long-Term Care Management
THE FIRST PROGRAM OF ITS KIND IN THE NATION!

The Bachelor of Science in Long-Term Care Management (LTCM) is an academic program offered online and in the classroom setting. It is a four year interdisciplinary degree addressing the need for a better prepared workforce for our nation’s aging and/or disabled populations. It is interdisciplinary as students will take courses from a variety of disciplines – sociology, psychology, business, nursing and the caregiving institute.

Employers today express the need for a new skill set in their workforce. They are looking for individuals who are compassionate, culturally sensitive, have managerial skills, and the ability to communicate well with others. The LTCM Degree prepares graduates to assist patients and families to connect with community resources, transition from hospital to home, and manage the care of residents in an institutional setting.

Our graduates will be prepared to help patients and their families better navigate today’s complicated health care system.

Dr. Leisa Easom, Associate Dean
The College of Nursing & Health Sciences

THE TIME IS NOW!

Critical care needs shaping tomorrow’s workforce:

- National crisis with Alzheimer's disease and related dementias
- Every 66 seconds someone in the U.S. develops Alzheimer's
- 1 in 10 adults in the U.S. age 65 and older has dementia
- Georgia is the 11th state with the fastest growing older adult population age 65 and older
- Georgia had a 50% increase in age 65 and older population from 2005-2015
- More than 5 million Americans are living with Alzheimer's. By 2050, this number could reach 16 million

1 in 6 children have developmental disabilities
1 in 68 children have autism spectrum disorder
