

Personal devices that can be connected to “GSW-Device” Wi-Fi network

NOTE: *All phones, laptops, and tablets should be connected to the “Canes” Wi-Fi network so that they're able to get to all GSW learning platforms.*

The following devices have been tested and approved to work on our “GSW-Device” Wi-Fi network in the residence halls after registering their MAC Address:

Smart TVs (Please try to set these up before you arrive on campus)

Amazon Fire TV Stick

Apple TV

PlayStation 5, PlayStation 4 Slim, PlayStation 4 Pro

Xbox One, Xbox Series X, Xbox Series S

Note: *Gaming consoles such as older PlayStation 4s and Xbox Ones will connect successfully, but they won't perform as well as newer consoles that can connect at 5GHz. Using 5GHz Wi-Fi prevents wireless interference which enables your devices to perform better in the residence halls.*

The following device types do NOT work on our Wi-Fi networks at GSW:

Wireless Printers (We have printers in the library and in almost every lab on campus)

Wi-Fi LED Lights

Google Chromecast

Google Home Devices
