Statement of teaching and research interests:

After a successful decade spent managing diverse IT systems across the university landscape, Jonathan Hobbs pursued a career in Academia. Drawing from his extensive real-world experiences, he infuses his classes with practical examples, engaging discussions, and challenging assignments, all aimed at equipping students with the skills they need for a seamless transition into their careers straight out of the program.

Research interests include AI, machine learning, cybersecurity, IoT security

Recent publications and scholarly output:
