

## Turnitin Feedback Studio GeorgiaVIEW Setup

Turnitin Feedback Studio – the latest version of Turnitin - offers a simplified, intuitive user experience that brings together the grading, feedback, and similarity checking services in one view. The contextual marking approach of the iPad application was incorporated in order to allow educators to click anywhere on the paper to leave a text comment or QuickMark comment. Essential improvements were made to support accessible workflows. For example, Feedback Studio now supports keyboard navigation in the interface, WCAG 2.0 accessible colors and contrast ratios, as well as provides a screen reader accessible Similarity Report.
